Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 11-14

because:

☒ the said international application, or the said claims Nos. 11-14 (with respect to industrial application) relate to the following subject matter which does not require an international preliminary examination (*specify*):

see separate sheet

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed (*specify*).

☐ no international search report has been established for the said claims Nos.

☐ a meaningful opinion could not be formed without the sequence listing; the applicant did not, within the prescribed time limit:

☐ furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.

☐ furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.

☐ pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under Rules 13*ter*.1(a) or (b) and 13*ter*.2.

☐ a meaningful opinion could not be formed without the tables related to the sequence listings; the applicant did not, within the prescribed time limit, furnish such tables in electronic form complying with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions, and such tables were not available to the International Preliminary Examining Authority in a form and manner acceptable to it.

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.

☐ See separate sheet for further details

1. Statement

Novelty (N)	Yes: Claims	1,2,4,5,7-15
	No: Claims	3,6
Inventive step (IS)	Yes: Claims	1,2,4,5,7-15
	No: Claims	3,6

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/IB2006/000876

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 11-14 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

- D1: WO 90/05133 A (PFIZER LIMITED; PFIZER INC) 17 May 1990 (1990-05-17)
- D2: WO 03/030898 A (MERCK & CO., INC; KIM, RONALD, M; CHANG, JIANG; CHAPMAN, KEVIN, T; MIL) 17 April 2003 (2003-04-17)

Document D1 discloses in examples 1-13 and 23 compounds which are novelty destroying for claim 6 of the present application. Examples 14-21 show examples which are novelty destroying for claim 3. Claims 3 and 6 are therefore not novel with respect to Article 33(2) PCT and can therefore also not be considered inventive according to Article 33(3) PCT.

Document D2 discloses piperidine comprising compounds for use in the treatment of HIV. This disclosure is considered to represent the closest prior art. The difference of the compounds of document D2 is enormous. The problem to be solved by the applicant was to provide alternative compounds for the treatment of HIV. Starting from document D2, a skilled person would not come to the solution of the present application as he would have to change the compounds of D2 completely. He would not have an incentive in the prior art to do so. It is therefore considered that the subject-matter of the present application, in as far it comprises novel subject-matter (claims 1,2,4,5,7-15), is inventive with respect to Article 33(3) PCT.

Re Item VIII

Certain observations on the international application

In the present set of claims, definitions for e.g. alkyl are given in the description which are not common to a person skilled in the art. Alkyl can mean a cyclic structure for example. This renders the scope of the entire application unclear for a person skilled in the art.

Claim 2 refers to an embodiment wherein a radical R3 is mentioned. There is however no definition given for said R3. This renders the scope of claim 2 unclear.
